DOCTORAL STUDIES	London School of Economics and Political Science PhD in Economics.	2023–present
PRIOR EDUCATION	London School of Economics and Political Science MRes in Economics. <i>Distinction</i> .	2021–2023
	Bocconi University MSc in Economic and Social Sciences. <i>Summa cum laude</i> .	2018–2021
	Bocconi University BSc in Economic and Social Sciences. <i>Summa cum laude</i> .	2015–2018
RESEARCH FIELDS	Political, Public, Labour Economics (primary) Organizational Economics, Environmental Economics, Innovation (secondary)	
AFFILIATIONS	Suntory and Toyota International Centres for Economics and Related Disciplines (STICERD, LSE)	2023–
JOB MARKET PAPER	Consulting and The Organizational Economics of the State	
WORKING PAPER	Polarized Technologies with Gaia Dossi · CEP Discussion Paper No. 2116, March 2026 <i>Abstract:</i> We study whether, and how, societal views about which problems are most socially important or worth solving are reflected in the direction of technological progress. We map polarized issues in the U.S. public debate to related technologies and link inventor records to voter registers. Compared to Republicans, Democrats are one-third more likely to patent technologies addressing climate-change mitigation or women’s reproductive health, and one-third less likely to patent weapons. These gaps are not explained by differences in inventive ability and persist within organizations. Party-technology alignment has strengthened over the past two decades, alongside rising polarization in U.S. society. This pattern also appears in subsequent innovation: inventors are more likely to build on aligned technologies and less on misaligned ones. These findings suggest that societal views and their polarization are important drivers of technological change, operating in part through inventors’ technology choices, with implications for innovation policy.	
WORK IN PROGRESS	The Geography of Development Programs with Beyza Gulmezoglu and Eddy Zou The Cost of Identity: Theory and Experimental Evidence from the Energy Labour Market with Gaia Dossi and Matthew OBrien <i>Abstract:</i> How do private and social identities affect occupational choice? We study this question in the energy labor market, where oil and gas firms play a fundamental role	

in the green transition. We design a novel survey experiment and administer it to first-time job seekers. We find that individuals assign positive amenity value to working for a company whose core business aligns with their environmental identity and disamenity value to those that conflict with it. Respondents with green identities are willing to forgo 20% of their salary to work in a renewable energy firm rather than a generic energy company, and require a 15% wage premium to accept a job in an oil and gas firm. This pattern also holds when individuals apply to work in teams focusing on clean energy within these firms. To isolate social-image effects, we randomize whether job choices are private or publicly disclosed. Social image concerns significantly influence occupational choices, especially for jobs perceived as socially stigmatized. We develop a model of occupational choice in which individuals have private preferences over jobs and derive utility from aligning with social norms. In structural simulations, we study how the social environment shapes the allocation of talent, productivity, and the pace of the green transition.

EXTERNAL PRESENTATIONS *(including scheduled)*

LSE POID Research Seminar (London, UK) · BSE Summer Forum (Barcelona, Spain)	2026
IEB Workshop on Political Economy (Barcelona, Spain) · UniCredit Marco Fanno Alumni Workshop (Turin, Italy) · Environmental Populism Conference (London, UK) · NICEP Conference (Nottingham, UK) · LSE PSPE Seminar (London, UK)	2025
Hayek Workshop on Institutions and Political Economy in Historical Perspective (London, UK) · Society for Economic Dynamics Annual Meeting (Barcelona, Spain) · EEA-ESEM Annual Congress (Rotterdam, Netherlands) · ASREC Europe Conference (Thessaloniki, Greece) · Bristol Economics of Innovation Workshop (Bristol, UK, invited) · Lewis Lab Graduate Student Workshop (Manchester, UK)	2024
LSE POID Research Seminar (London, UK) · LSE PSPE Seminar (London, UK) · ACES Summer School in Political Economy (Berkeley, USA)	2023
Bocconi Christmas Workshop (Milan, Italy) · Bocconi Summer Workshop (Milan, Italy)	2022

RESEARCH GRANTS

Total grant funding: approximately \$51,000 (EUR 44,000)

STICERD PhD Grant, joint with Beyza Gulmezoglu and Eddy Zou (£5,000)	2026
Global School of Sustainability PhD Small Project Grant (£5,000)	2026
Programme on Cohesive Capitalism PhD Grant (£5,000)	2026
STICERD PhD Grant (£5,190)	2026
Google Cloud Research Credits Program (\$980)	2026
STICERD PhD Grant (£5,000)	2024
STICERD PhD Grant, joint with Gaia Dossi (£5,000)	2023
STICERD Michio Morishima Fund (£700)	2023
LSE Phelan Research Grant (£2,500)	2023
STICERD Hayek Programme PhD Grant, joint with Gaia Dossi (£4,000)	2022

AWARDS

Cohesive Capitalism PhD scholarship	2024
LSE Class Teacher Award, based on student ratings	2023

	Outstanding Distinction for the <i>Bonaldo Stringher</i> scholarship, Bank of Italy	2022
	LSE Economics Departmental Award	2021
	UniCredit Foundation <i>Fabrizio Saccomanni Scholarship</i>	2021
	Fondazione Famiglia Legnanese scholarship	2019
RESEARCH EXPERIENCE	Research assistant to Tim Besley (LSE)	2025–
	Research assistant to Michael Callen (International Growth Centre and LSE)	2023
	Research assistant to Gilat Levy and Ronny Razin (LSE)	2022
	Research assistant to Paolo Pinotti (CLEAN, Bocconi University)	2020–2021
	IGIER visiting student, mentored by Guido Tabellini	2019–2021
	Research assistant to Swapnil Singh (CEFER, Central Bank of Lithuania)	2019
OTHER WRITING	Polarisation is Not a Myth: Political Views Shape the Creation and Spread of Technology with Gaia Dossi · <i>CentrePiece</i> , Centre for Economic Performance, LSE, Vol. 31, Issue 2, Summer 2026	
	Polarization is Not a Myth: It Is Reflected in the Creation and Diffusion of New Technologies with Gaia Dossi · <i>LSE United States Politics and Policy Blog</i> , March 2026	
TEACHING	London School of Economics and Political Science Graduate Teaching Assistant for: – Introduction to Statistics (PP430E), Executive Master of Public Administration and Policy – Introduction to Quantitative Methods (PP408), Master of Public Administration – Pre-Sessional Coding and Mathematics Bootcamp (PP407), Master in Data Science for Policy – Econometrics 1 (EC1C1), undergraduate – Microeconomics 1 (EC1A3), undergraduate Graduate Teaching Fellow for: – Quantitative Methods for Public Policy (PP402), Master of Public Policy	2024 2024 2024 2023–2025 2022 2023
ACADEMIC SERVICE	Referee: <i>Economica</i> ; Journal of Economic Behavior and Organization Organizer: Environmental Populism Conference (2025); LSE Applied Microeconomics Student-Only Seminar (2023–2024) Co-Founder: LSE Applied Microeconomics Student-Only Seminar (2023) Discussant: BSE Summer Forum (2026); Arthur Lewis Lab Student Workshop (University of Manchester, 2024) Other: Managing LSE Economics database for Research Excellence Framework	2025–

SKILLS

Programming and software: Stata, Python, ~~W~~^L~~A~~^T~~E~~^X, Qualtrics, MS Office

Languages: Italian (native) · English (fluent) · Spanish (basic)
